

DIY Fiberglass Pools!

Pool Elevation Definitions

- 1. Finished Grade**- The fixed point around the pool that all other elevations are based on. For example, the elevation of an existing patio 10' from the pool that you're planning to tie into would be the finished grade.
- 2. Slope**- The amount of fall in a span of patio
- 3. Top of Coping**-The elevation of the top of the coping at the pool
- 4. Top of Pool**-The elevation of the top of the fiberglass pool shell without any coping
- 5. Top of Gravel Depth**- Elevation of the top of the gravel base the pool sits on.
- 6. Top of Dig**-Elevation of the top of the excavation at a given point.
